

ADVANCED WHITENING CREAM

Features :

Fade the look of hyperpigmentation and uneven skin tone with powerful skin lightening agents. The highly concentrated Alpha Arbutin and stable Vitamin C target the primary causes of discoloration while helping to inhibit tyrosinase activity. Retinol stimulates cell turnover and decreases melanin synthesis. Daily use of this whitening cream promotes bright skin tone and restores softness and radiance.

Active Ingredients : Alpha Arbutin 2%, Ethyl Ascorbic Acid 2%, Retinol 0.15%, Niacinamide, Hydroxyphenoxy Propionic Acid, Exopolysaccharide, Sweet Almond Oil, Orange Flower Water.

Directions : Apply on the cleansed and toned skin in the evening daily. SPF sun protection must be worn daily when using this product.

Skin Types : All skin types. Do a patch test on sensitive skin before using.
